

*Learn how to implement multi-species cover cropping, intercrops, legumes and crop rotations on your farm.*

In this course you will learn how to increase soil health and crop productivity by using diversity cropping strategies such as multi-species cover cropping, intercropping and crop rotations. This course is co-delivered by Simon Mattsson, a sugar cane Nuffield Scholar and one of Australia's leaders in multispecies cover cropping; along with David Hardwick from Soil Land Food. The course includes sessions on developing a plan for implementing Diversity Cropping on your place. Topics covered in the course include:

- What is Diversity Cropping: *2 or more species in the paddock at the same time.*
- Multi species Cover Crops, Intercropping, Pasture Cropping & No Kill Farming
- Why & How it works
- Soils and how they function

- Soil Health and how to manage it
- Soil & Paddock Preparation
- Seed Mixes: selection & rates
- Machinery & Sowing
- Crop Management
- Termination Options: spraying, crimping, grazing or incorporation
- Making it work on your place
