

*This soils course is for graziers who want to improve their soil management skills and management.*

Delivered on farm and in the paddock, the course will help you build confidence in making decisions about the soils on your place. By the end of this course you will be able to:

- Understand soils and how they function in grazing landscapes
- Understand how grazing management, animals and plants interact with soils and soil health
- Read soil tests with confidence
- Identify and map soil types across your property
- Assess soil health in the paddock and using soil tests
- Identify soil constraints such as low organic matter and compaction.
- Set benchmarks for your soils
- Take effective action to address soil issues that are impacting on the grazing business and landscape.
- Manage soil nutrients effectively and evaluate fertiliser and soil input options where relevant.
